

THE ORIGINAL
AEROplus
WIND DEFLECTOR

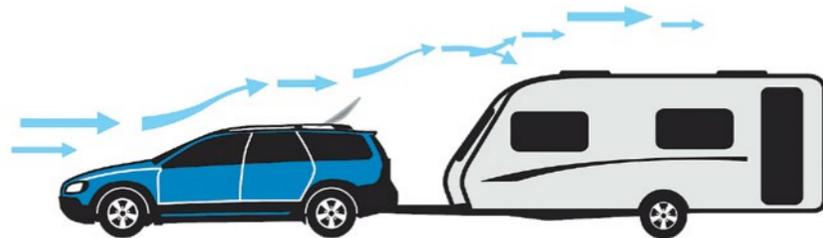

The Aero plus pays for itself in one trip by greatly improving your fuel economy

SAVE THOUSANDS IN FUEL!

The Aero plus wind deflector will improve your fuel economy and pay for itself in savings several times over

One of vanners' biggest expenses on the road is fuel, so any product that can improve your fuel economy is a must! The Aero plus utilises the latest in aerodynamic technology in order to improve your fuel economy and make your van safer and more stable to tow. A universally fitting, simple-to-install and lightweight roof mount, this is a true engineering marvel for vanners.

Roof-mounted air deflector that drives the flow of air smoothly over the top of your caravan.

GREATER SAFETY AND STABILITY FOR TOUGH AUSSIE ROADS

Fred swears by the Aero plus, it's saved him thousands! Not only will it save you money, it makes for a much smoother towing experience

TRUCKIE TECHNOLOGY

The Aero plus utilises technology used by trucks to save you thousands of dollars in fuel. The Aero plus is a roof-mounted air deflector that drives the flow of air smoothly over the top of your caravan – reducing drag, increasing towing stability and improving fuel economy. Easily fitted to most roof racks, including both standard and 'aero' types, it comes with universal fittings for easy initial installation and quick fitting and removal as needed. The Aero plus will improve your fuel economy greatly, ensuring that after one trip towing with the Aero plus installed, it will have already paid for itself!

THE BENEFITS

- ✓ REDUCED DRAG
- ✓ INCREASED STABILITY
- ✓ IMPROVED FUEL ECONOMY
- ✓ GREATER PEACE OF MIND
- ✓ SAFER AND MORE COMFORTABLE
- ✓ REDUCES YOUR CARBON FOOTPRINT

TRIED AND TESTED

Fred is a huge supporter of the Aero plus having toured with the product all around Australia, greatly improving his fuel economy and providing a more comfortable towing experience. Not only do we and thousands of other vanners think this product is great, its been independently tested to prove its worth. The Aero plus has been proven to work in independent testing at the Motor Industry Research Association (MIRA), the leading automotive research body in Britain, as well as by numerous Australian industry experts and the university of Johannesburg. The Aero plus has received high praise from industry experts all over the world. Grab one today and we promise you won't be disappointed!

CUSTOMER TESTIMONIAL

"From Norseman to Penong and return, 1125km each way, the average fuel consumption was 16.7 litres/100km without Aero plus and 13.4 litres/100km with it. The van rides much better, especially in head winds, and at times I forgot the van was there with the Aero plus fitted. The ride is much better and the whole set-up feels right. Originally the intention was to save fuel but now I feel the improved ride, especially in head winds, is a bigger factor"

– Michael Prestwich, Perth. ■
