

SIMPLE, SEAMLESS, STRONG

The incredible annexe range that will change your camping set-up for the better!

An annexe is great for any 4WDer, especially while camping, as it provides protection from the weather, and gives you an extra living area for family, friends, and your gear. Purple Line have recently developed an inflatable annexe range that hooks up to almost any caravan or camper trailer, giving you more space and shelter in those extreme outback conditions.

NO MORE POLES!

The Orbit Air Astro and Orbit Air Comet don't rely on tent poles, so it's much easier to manage as the overall weight is reduced without those bulky poles. It's quick and easy to set-up and take down, which can be done in less than 10 minutes, so you can spend less

time setting up and more time relaxing at camp.

DESIGNED FOR DURABILITY

The main structure uses inflatable air beams, which pulls the tent walls taut, making it sturdy and strong. These air beams flex with the wind, and the modern curved design keeps it firm on the ground so it won't blow away. Air beams have a 3-layered protective cover and a high-strength 300D micro weave poly cotton canvas, which makes it tough and durable in harsh camping conditions. It's also weatherproof with superior UV protection of level UPF 50+ so it can withstand the scorching sun, torrential rain, and anything else that's thrown at it.

FEATURES

- Removable side door panels
- Plastic LED sleeve (for optional LED light strip)
- Pre-attached storm buckles and webbing straps
- Inflation hand pump with pressure gauge
- Sail track, adjustable ladder bands, and steel pegs included

UNDERCOVER OUTDOOR LIVING

The annexe simply hooks onto your trailer, giving you an instant outdoor living space. If it starts to rain, you can chuck all of your gear in so nothing gets wet. The 3-layered window system and heavy-duty fly screens on the walls keeps the bugs out, which also keeps it well ventilated and cool. The Orbit Air Astro and Comet annexes provide extra room so you can enjoy the outdoors without being effected by the elements.

COMPACT AND CONVENIENT

These annexes are compact and take up little space when packed away, so they only need a small storage area while travelling. The removal of tent poles makes them less bulky, which also reduces weight in your rig and gives you more space for other gear. The best part is, it all comes packed in a practical carry bag.

DURABLE AND RELIABLE!

KEEP OUT THE DUST, THE DIRT, AND THE BUGS!
